Connecting Global Swine Industry Resources

Exploring New Opportunities in Asia's Key Swine Markets

The 15th Leman China Swine Conference, an international platform for scientific exchange, will be held concurrently with the World Swine Industry Expo, a comprehensive showcase of the full value chain. Together, they form one of the few swine industry events in Asia that integrate cutting-edge research with industry resources on a single platform.

Since 2021, the event has consistently attracted over 10,000 delegates. It has also received long-standing support from global industry leaders and leading Chinese swine enterprises, including Boehringer Ingelheim, Zoetis China, Phibro Animal Health, dsm-firmenich, Vilofoss, CID LINES, H&V, Trouw Nutrition, BIOSCWIN, as well as Muyuan Foods, China Animal Husbandry Industry Co., Ltd., Huapai Bio, Youben Vaccines, Ningbo Second Hormone Factory, Ningbo Sansheng, Yuanzheng Pharmaceutical, and other representative companies.

The event collaborates with **87** organizations in China and abroad

Universities, research institutes, industry associations, leading enterprises, and international swine organizations come together to build a global platform for exchange and cooperation.

27 Supporting Organizations (Selected)

China Agricultural University The University of Minnesota Northwest A&F University Nanjing Agricultural University
Jilin University National Animal Husbandry Science and Technology Innovation Alliance Henan Agricultural University

43 Co-organizers (Selected)

Henan Pig Industry Association Hunan Pig Industry Association Hunan Feed Industry Association
Sichuan Animal Agriculture Association Sichuan Association of Feed Industry Chongqing Animal Agriculture Association
Chongqing Feed Industry Association Chongqing Academy of Animal Husbandry and Veterinary Medicine
Shaanxi Animal Agriculture Association Shaanxi Association of Animal Science and Veterinary Medicine
Shandong Feed Association

17 International Collaborators (Selected)

USDA China Business France Embassy of Canada in China Faculty of Veterinary Sciences, Chulalongkorn University
Animal Husbandry Association of Vietnam SPACE NAFTC U.S. Grains Council British Pig Association

International Reach

Based in Asia · Connecting Global Swine Industry Resources

The previous edition welcomed industry organizations, companies, and professional visitors from nearly 30 countries and regions across Asia, Europe, North America, South America, and Africa. Delegations from Southeast Asian countries, including Vietnam, the Philippines, and Thailand, attended, underscoring the event's position in Asia and its global reach.

*Data are based on online visitor registrations and exclude visitors invited through offline outreach and industry association groups.

Why Attend?

By attending the 2026 Leman China Swine Conference & World Swine Industry Expo, you will gain:

Gain Global Market Insights and Unlock New Growth Opportunities

Stay ahead of global swine industry trends and market demand, connect with cross-regional resources, and open new pathways for business growth and international collaboration.

Meet Global Swine Industry Leaders Face-to-Face

Build high-value connections with international experts, large-scale producers, technology suppliers, and industry decision-makers.

Discover Advanced Technologies and Innovative Solutions

Explore the latest applications in animal health, smart farming, precision nutrition, biosecurity and more.

Expand Your International Business Network

Identify potential partners, suppliers, and market opportunities, and establish long-term industrial partnerships.

Limited-Time Pre-registration Benefit for Professional Visitors

Pre-register as a professional visitor to the World Swine Industry Expo and receive complimentary access to the Leman Pre-Conference Forum on October 22, covering herd health, nutrition management, reproductive management, farm operations, and regional industry development.

Free Pre-registration
World Swine Industry Expo

The pre-conference forum: key issues shaping the global swine industry.

01

Next-Generation Swine Veterinary Practice and Herd Health Management

02

Swine Nutrition, Feed Management and Precision Sow Feeding

03

Farm Operations, Reproductive Management and Production Efficiency

04

Air Filtration, Biosecurity, Disease Control and Elimination

05

Swine Production Challenges in Southeast Asia and Dialogue with Industry Leaders

You Decide to Go. We Take Care of the Rest.

International Visitor Support, Every Step of the Way

We understand that attending an event abroad is about more than the program—it also requires a smooth and efficient visitor experience.

To help international professionals attend with confidence, we provide comprehensive support covering registration, visa documentation, and on-site participation.

01

Visa Support

After completing registration, you may request visa-support and attendance-confirmation documents to assist with your visa application.

02

Registration Assistance

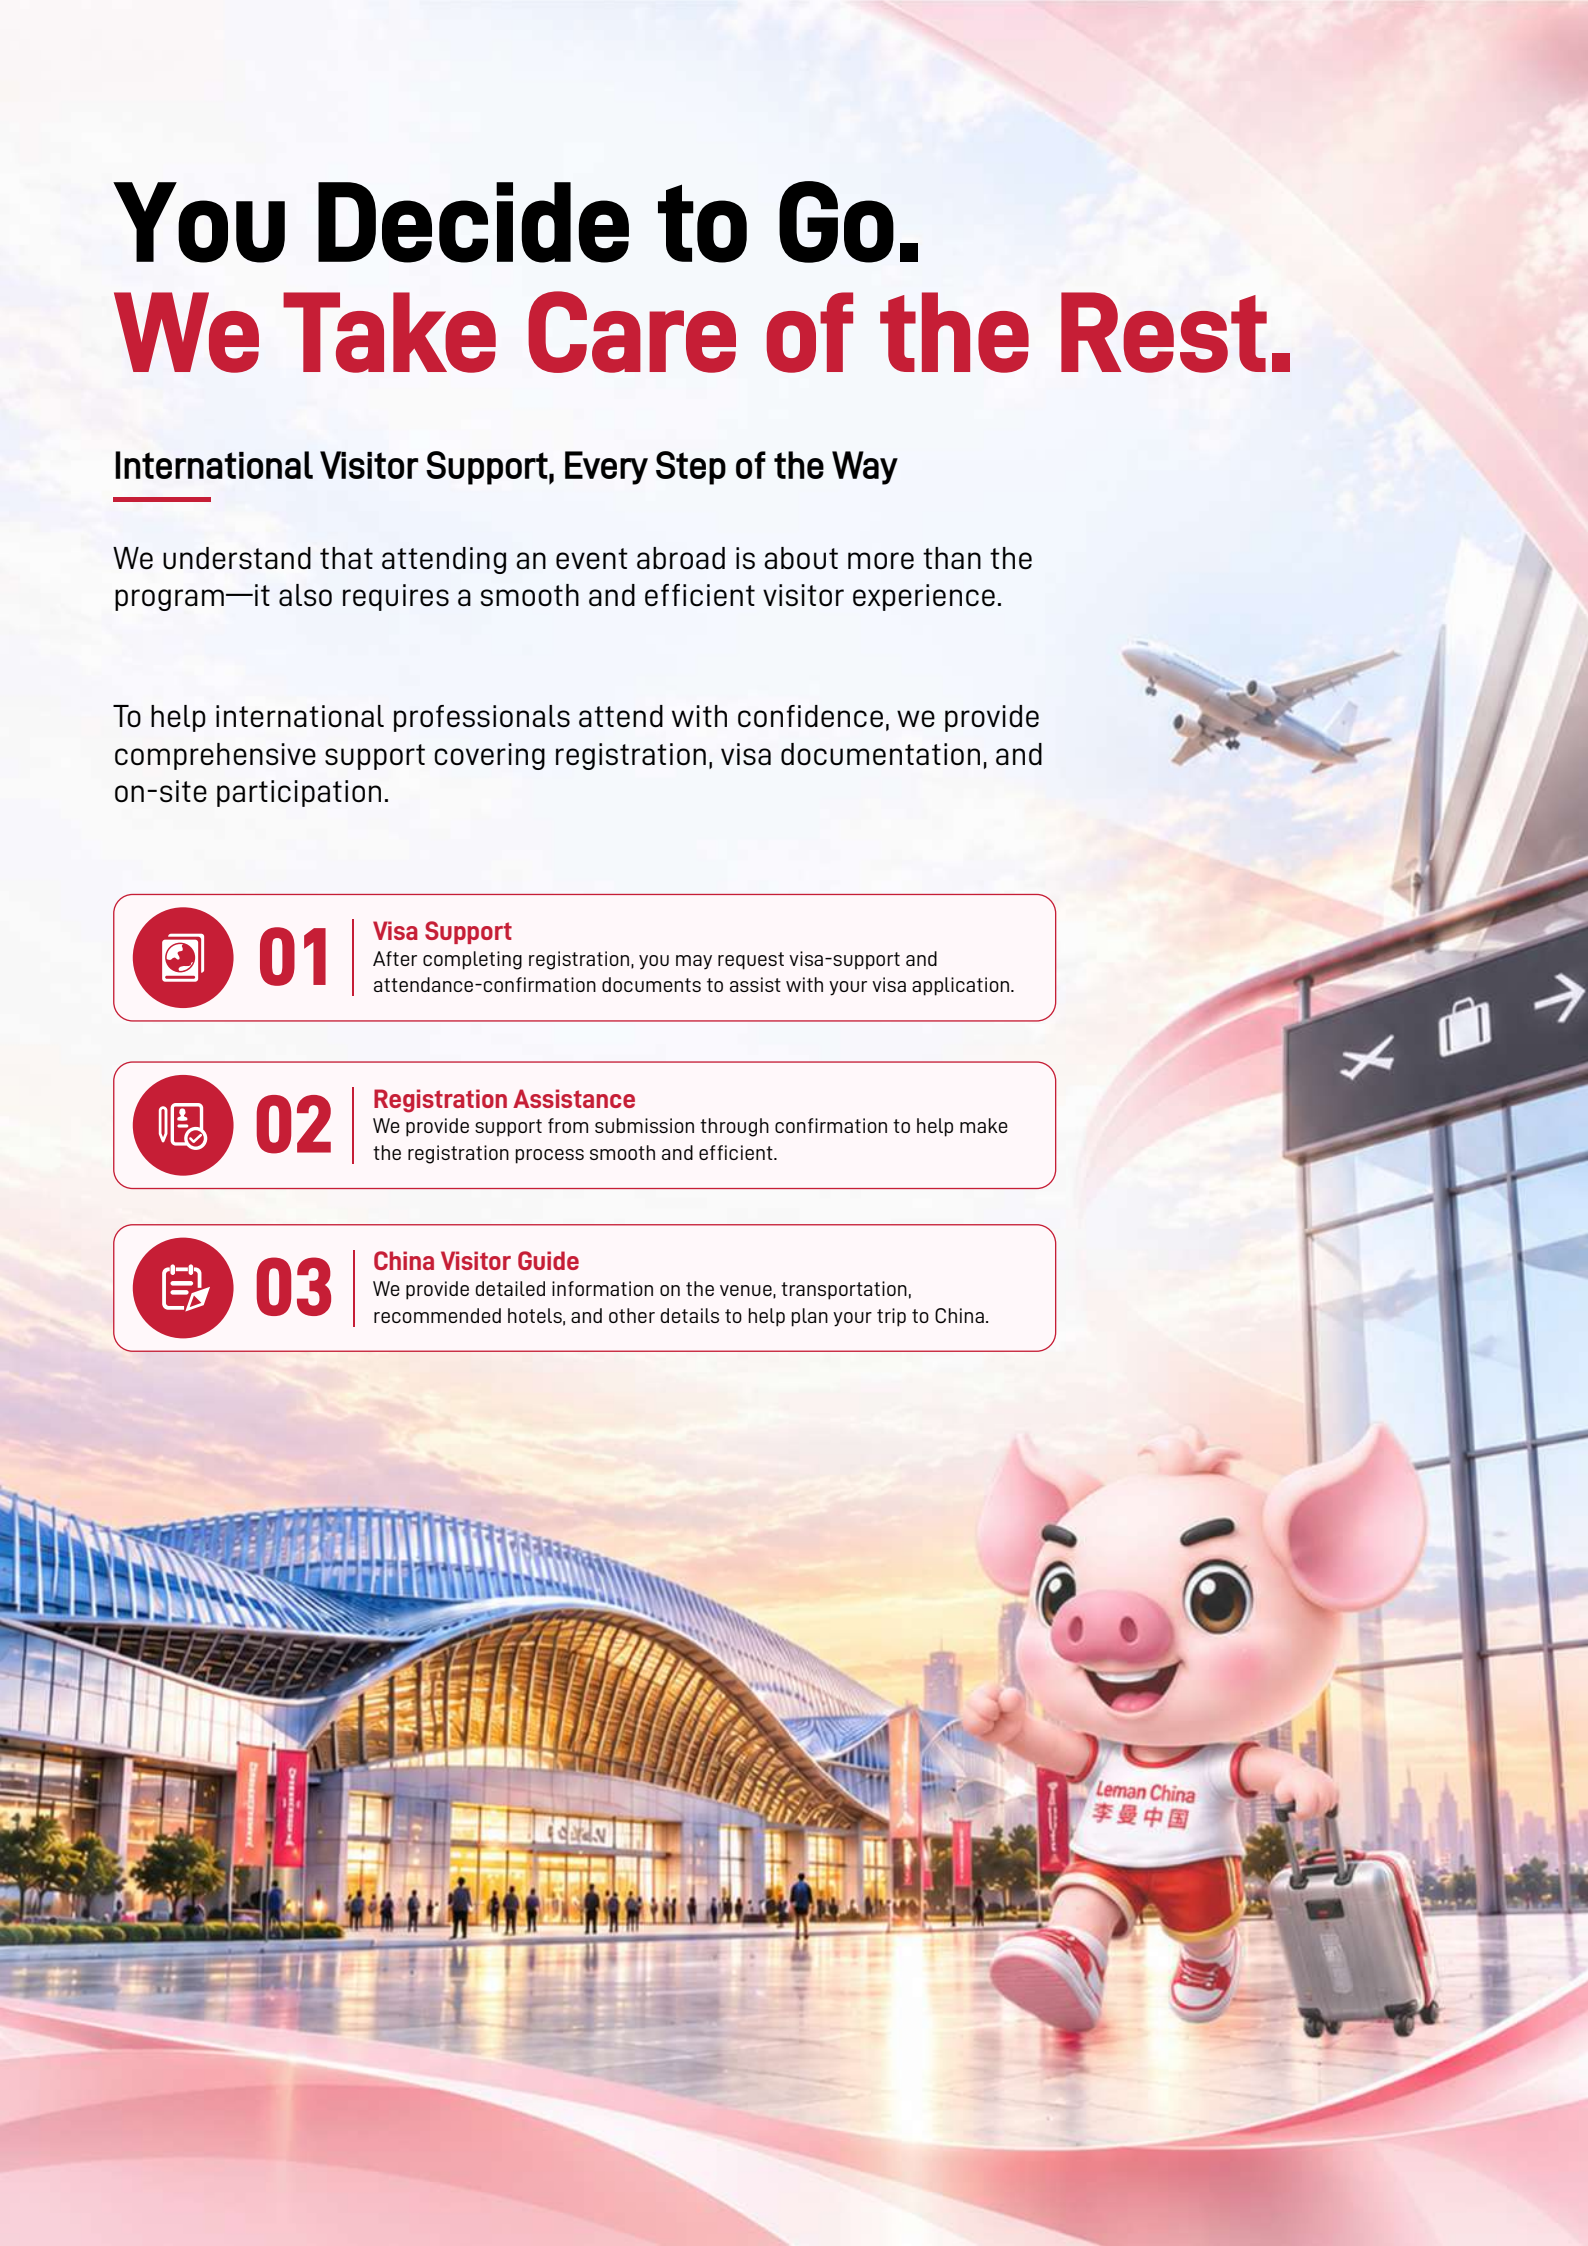

We provide support from submission through confirmation to help make the registration process smooth and efficient.

03

China Visitor Guide

We provide detailed information on the venue, transportation, recommended hotels, and other details to help plan your trip to China.

The 15th Leman China Swine Conference

Science-Based and Deeply rooted to China's Swine Industry for 15 Years

10,000+

projected
delegates

30+

participating countries
and regions

120+

projected
speakers

150+

projected presentation
topics

Bringing together experts from around the world, the conference explores key issues shaping the future of the swine industry—from production challenges in Southeast Asia to sustainable practices in Europe. Key topics include, but are not limited to:

Herd Health, Disease Prevention, Control and Elimination

Focused on major diseases including porcine reproductive and respiratory syndrome (PRRS), porcine epidemic diarrhea (PED), post-weaning diseases, mycoplasma infections and ileitis, with insights into surveillance, diagnostics, prevention, control and elimination practices.

Swine Production, Reproductive Management and Production Efficiency

Exploring precision farm management, sow reproduction, longevity and mortality, and post-weaning management, with a focus on reducing costs, improving efficiency, and optimizing production.

Nutrition Management and Precision Feeding

Focusing on feed management in low-margin markets, low-protein diets, precision nutrition for sows and AI-enabled precision feeding - promoting science-based nutrition management to help reduce costs and improve efficiency.

Biosecurity, Sustainable Production and Industry Recognition

Discussing air filtration, feed-supply-chain biosecurity, disease-risk management, antimicrobial resistance, One Health, circular production and European approaches to sustainable swine production.

Technology Innovation, Data Applications and Pork Safety

Exploring applications of artificial intelligence, machine learning, big data and computer vision in farm management and meat inspection, while addressing pork safety and quality from farm to fork.

* Additional topics will be announced.

Professional simultaneous interpretation will be available on site to enhance your conference experience, break down language barriers, and enable effective communication with experts from around the world.

Leman China Swine Conference Registration Fees

Three-day Conference Registration

US\$450 per person

One-day conference registration

US\$240 per person

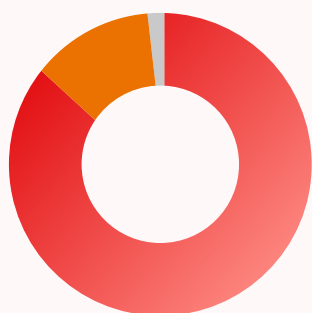

Student registration (valid student ID required)

US\$200 per person

* The registration fee includes access to conference presentations and materials from October 22 to 24, a conference gift, two lunches, one dinner, and refreshments during all breaks.

The 15th World Swine Industry Expo

One Expo Connecting the Entire Swine Value Chain

Designed as an international platform for producers, technology suppliers, and industry partners worldwide, integrating exhibition, exchange, procurement, and cooperation.

Explore New Business Opportunities

The World Swine Industry Expo is more than a technology showcase—it is an important gateway to cooperation across the global swine value chain.

At the expo, you can ▼

Evaluate Products and Technologies Efficiently

Compare products, equipment, and solutions from multiple sectors in one location.

Connect Efficiently with Suppliers

Meet suppliers face to face and learn about product suitability, service capabilities, and terms of cooperation.

Build Industry Partnerships

Engage with producers, industry organizations, and technology partners to explore new areas of cooperation.

Understand Changing Market Needs

Gain insight into technology demand, product directions, and industry trends in China and across Asia.

Solutions Across the Entire Swine Value Chain

From genetics, breeding, animal health, and feed nutrition to smart farms, biosecurity, environmental solutions, slaughtering, and cold-chain logistics, the World Swine Industry Expo presents products, technologies, and services covering the major links of the swine value chain. Make one visit to connect with suppliers efficiently, discover innovative applications, and explore market opportunities.

	National Pavilions & Leading Industry Enterprises	Featuring national pavilions, major swine-producing regions, and brand showcases from leading industry enterprises
	Veterinary Pharmaceuticals & Animal Health	Veterinary drugs, animal health products, vaccines, and pharmaceutical raw materials
	Feed & Feed Additives	Animal feed, feed ingredients, feed additives, feed processing technologies, and equipment
	Swine Farm Construction & Equipment	Large-scale swine production technologies, production equipment, farm design, and engineering solutions
	Smart Swine Farming & Automation	Smart pig farms, robotics, farm information management systems, sensor technologies, and related equipment
	Environmental Control & Feeding Systems	Feeding systems, watering systems, ventilation, climate control, and other pig farm equipment
	Biosecurity & Disinfection	Cleaning and disinfection solutions, biosecurity technologies, facilities, and equipment
	Veterinary Instruments and Diagnostics	Veterinary instruments, disease diagnosis and testing technologies, services, and related equipment
	Breeding Stock & Genetic Improvement	Breeding pigs, artificial insemination equipment and consumables, genetic breeding technologies, and related equipment
	Environmental Protection & Harmless Treatment	Manure treatment technologies and equipment, dead pig harmless treatment, and other environmental protection equipment
	Logistics, Slaughtering & Cold Chain	Livestock transport vehicles, meat slaughtering and processing equipment, preservation, refrigeration, storage, and transportation solutions
	Industry Services & Media	Swine farming training, education and technical services, industry publications, technical materials, and professional journals
